Occupational Health & Safety Management

(NQF 4)

Programme Details

This programme enables employees in leadership or management positions to monitor the application of safety, health and environmental protection procedures to maintain the discipline of the safety, health and environmental protection system. Learners are able to monitor adherence; promote and maintain preventative measures; coach their work team; and evaluate and suggest changes to the system. This programme also provides delegates with the skills to implement and maintain health and safety legislation in a workplace.
